Mohamad Dib

Wireless Networking Engineer

Sidon, Lebanon | +961 79 067 170 | mohamaddib.eng@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Communication Systems Engineer (M.Sc., KTH Royal Institute of Technology) working across wireless networking, cybersecurity, and full-stack development. Currently reviews backend code security for an AI platform and builds websites as a development intern. Skilled in Python, React, and network security (Cisco, Fortinet, VPNs), backed by research in secure wireless communication.

PROFESSIONAL EXPERIENCE

Cybersecurity Engineer – Platform Security - **Majlisync** | Remote, Part-Time *Oct 2026 – Present*

- Review Python backend code of an AI-driven platform for security vulnerabilities, assessing risk and recommending fixes.
- Track findings and remediation through Jira in an Agile team, verifying fixes with the development team.

Website Development Intern - **Future Line Consulting** | Remote, Internship *Nov 2026 – Present*

- Build and deploy the company website (futurelineconsulting.com) with HTML5, CSS3 and JavaScript: responsive, mobile-first pages and a branded logo-animation splash screen.
- Host and maintain the site on Hostinger, optimizing assets for fast loads and applying web security and SEO basics.
- Deliver IT training and user documentation so non-technical team members can use digital tools independently.

Full-Stack Web Development Intern - **The Digital Hub, UNRWA** | Beirut, Hybrid *Jun 2026 – Sep 2026*

- Built type-safe frontends (React, Next.js, TypeScript) and REST APIs (Node.js, Express.js, FastAPI, Django REST Framework).
- Implemented JWT authentication, RBAC, and secure sessions; integrated LLM/RAG features and deployed via CI/CD.

Robotics Instructor - **Bait Atfal Assomoud (NISCVT)** | Sidon, On-site *Sep 2026 – Oct 2026*

- Designed and taught a 39-hour hands-on Arduino robotics course for youth, guiding students to build and present final projects.

IT Systems & Technical Support Engineer - **Khateeb Home Appliances** | Beirut, On-site *Dec 2025 – May 2026*

- Administered IT networks and POS systems, maintaining zero downtime via proactive monitoring and troubleshooting.
- Diagnosed and resolved hardware, software, and connectivity issues independently, minimizing operational disruption.

PROJECTS

M.Sc. Thesis: Secure Over-the-Air Computation | GitHub

- Designed a secure Over-the-Air Computation framework using uniform input distributions and zero-forced artificial noise.
- Built Python/MATLAB simulations of RF impairments and multi-node wireless channels; defended thesis to an academic panel.

CarSage: AI-Powered Car Companion Web App | Live Demo

- Built a full-stack car companion app (React, FastAPI, Supabase/PostgreSQL with Row-Level Security) with Google Maps trip costing and an AI repair advisor cross-checked against NHTSA recall data.

Vehicular Communication Security (VANETs) | GitHub

- Engineered VANET security frameworks for authentication and privacy, using PKI cryptography to secure data exchange over wireless channels.

TECHNICAL SKILLS

Wireless & RF Engineering: 5G NR / LTE / 3GPP, RF Planning & Analysis, MIMO & Beamforming, Signal Processing (MATLAB)
Networking & Security: TCP/IP, OSPF/BGP, VPNs, Cisco & Fortinet, Zero Trust, PKI, Wireshark, Secure Code Review
Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Zustand, TanStack Query
Backend: Node.js, Express.js, Python, FastAPI, Django, RESTful APIs
Databases & Auth: PostgreSQL, Supabase, MySQL, MongoDB, SQL/NoSQL, JWT, RBAC, Secure Cookies
AI & Testing: LLMs, RAG, Prompt Engineering, AI API Integration, Jest, Vitest, Unit/Integration Testing
Architecture & DevOps: Clean Architecture, SOLID, Design Patterns, Git/GitHub, CI/CD, Jira, Cloud Deployment

EDUCATION

Master of Science in Electrical Engineering, Communication Systems (Wireless Networking Track) *Jan 2025*
KTH Royal Institute of Technology, Stockholm, Sweden

Bachelor of Science in Communication Engineering *July 2021*
Lebanese International University, Beirut, Lebanon
